

Kubat Pharmacy's third-generation pharmacists and owners, Mike and Matt Kubat, lead an experienced team of health care and support professionals in serving their clientele with the same exceptional service and care their grandfather, Amil Kubat, established when he founded his namesake pharmacy in 1935.

"People typically see their pharmacist more than their health care provider, so we have a personal touch," Mike said. "And we also offer quite a few services that big-box pharmacies don't offer."

The full-service pharmacy provides specialty and custom compounding services. Kubat also offers a wide range of home and durable medical equipment, including mobility support devices, independence aids, and respiratory products.

A new partnership with a local investment group, Percipio Partners, is now positioning Kubat for growth and expansion.

"Mike and I were looking to partner with a new level of skillsets that will allow us to take our business to the next level of comprehensive health care," Matt said. "In accomplishing that goal, we can now serve patients in a more coordinated capacity."
